

Rebound Therapy.org is excited to announce their partnership with World Jumping UK

## Flexi-Bounce Therapy for Children and Adults with Additional Needs Making Therapy Fun – Every Day!

ReboundTherapy.org. with World Jumping high-end rebounders providing **Flexi Bounce**

**Programme/Therapy** for the benefit of children and adults with special needs in the UK.

We have specially designed an orthopaedic quality rebounder called the Flex-Bounce, together with a programme of use and development, so that students and service users can benefit from Flexi-Bounce Therapy sessions in between their weekly Rebound Therapy sessions, and at home during holidays.

Schools and centres that are not able to provide Rebound Therapy, now have the opportunity to enable their students to receive many of its benefits by using the Flexi-Bounce Therapy programme.

The programme complements Rebound Therapy perfectly and it can be provided in any convenient space; in the classroom, living room, bedroom, outdoors etc.

**Flexi-Bounce rebounders and the development programme are designed for use by teachers, trainers, parents, carers, teaching assistants, physiotherapists, other healthcare professionals and sports coaches.**

Flexi-Bounce rebounders come with a certificated training course so that supervisors will know exactly how to provide the most safe, beneficial and enjoyable experience for the student.

## Flexi-Bounce Rebounders

- Flexi-Bounce Easystore includes an online, certificated training course specially developed by ReboundTherapy.org – the governing body and international consultancy for Rebound Therapy.
- Flexi-Bounce Stackable also includes the training course, and when eleven or more rebounders are purchased, the training course will be provided in house, where the tutor will come to your school or centre to deliver the training course.

## Flexi-Bounce Easystore & Stackable Rebounders

World Jumping excellent high-end rebounders for therapeutic, remedial and rehabilitation use. The rebounders are of superior quality, made in Europe with German engineering and TUV SUD certification for quality, durability and health & safety.

The high-end rebounders with the handlebar specifically designed for transitioning and independence development bouncing exercises.

The rebounders consist of a classic rebounder, detachable handrail bracket and easily adjustable design handle bar and a protection cover for rubber rope and frame. The versatile Flex-Bounce rebounder model opens up a new and wide range of exercise possibilities.
